

INTERNATIONAL FESTIVAL OF ART & CONSTRUCTION

▲▲ TORRES VEDRAS · PORTUGAL ▲▲

FESTIVAL OVERVIEW - IFAC 2017

Cadriceira & Serra do Socorro

The **Live With Earth Organization**, for the Global Sustainable Development by Actions in Portugal, organized the sixth edition of IFAC - INTERNATIONAL FESTIVAL OF ART AND CONSTRUCTION, from 17 to 27 of August 2017, in Cadriceira and Serra do Socorro, Torres Vedras, Portugal.

It was a festival focused on learning and experimenting together, solutions and creativity for the self-sufficiency and for a brighter world. We will keep in our memories the activities such as traditional games, music and dance, the construction and artistic projects, the workshops, the documentaries, the concerts and parties at night, the involvement with the local community, the magical atmosphere in the forests, the multicultural worldwide meeting, the beautiful impact left behind in the village and in the mountain, the friends we met, the tasks and techniques we have learned, and some many more reasons that has made this edition of IFAC special, in quality and not in quantity, for less is more.

With more than 8 permanent projects, and 10 diverse workshops and speeches, this edition was focused on the participants learning and the social impact created in the Cadriceira Village, increasing the human capacities of the people involved in this new international movement in Portugal. Stay tuned for more news!
